Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities all the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

Manuscripts must contain a statement to the effect that all human studies have been reviewed by the appropriate ethics committee and have therefore been performed in accordance with the ethical standards laid down in an appropriate version of the 1964 Declaration of Helsinki. It should also be stated clearly in the text that all persons gave their informed consent prior to their inclusion in the study. Details that might disclose the identity of the subjects under study should be omitted.

Reports of animal experiments must state that the "Principles of laboratory animal care" (NIH publication No. 85-23, revised 1985) were followed, as well as specific national laws (e.g. the current version of the German Law on the Protection of Animals) where applicable.

The managing editors reserve the right to reject manuscripts that do not comply with the above-mentioned requirements. The author will be held responsible for false statements or for failure to fulfil the above-mentioned requirements.

All articles published in this journal are protected by copyright, which covers the exclusive right to reproduce and distribute the article (e.g., as offprints), all translation rights as well as the rights to publish the article in any electronic form. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0340-1200, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

The Canada Institute for Scientific and Technical Information (CISTI) provides a comprehensive, world-wide document delivery service for all Springer-Verlag journals. For more information, or to place an order for an copyright-cleared Springer-Verlag document, please contact Client Assistant, Document Delivery, Canada Institute for Scientific and Technical Information, Ottawa K1A 0S2, Canada (Tel: 613-993-9251; Fax: 613-952-8243; e-mail: cisti.docdel@nrc.ca).

This journal is included in the Springer Journals Preview Service. The Springer Journals Preview Service offers the tables of contents and BiblioAbstracts via Internet before the issue reaches the subscribers. Tables of contents are free of charge; BiblioAbstracts are available for a small annual fee. Details can be obtained by sending an e-mail message containing the line **help** to svjps@springer.de.

Contents of Volume 76

- Albani C → Suri RE
 Alexander RMcN: A minimum energy cost hypothesis for human arm trajectories 97
 Anastasio TJ: A burst-feedback model of fast-phase burst generation during nystagmus 139
 Andrade MA, Casari G, Sander C, Valencia A: Classification of protein families and detection of the determinant residues with an improved self-organizing map 441
 Arbib MA → Dominey PF
 Başar E, Yordanova J, Kolev V, Başar-Eroglu C: Is the alpha rhythm a control parameter for brain responses? 471
 Başar-Eroglu C → Başar E
 Bellomo A, Inbar G: Examination of the λ equilibrium point hypothesis when applied to single degree of freedom movements performed with different inertial loads 63
 Bruner LJ → Harvey JR
 Buchanan JJ, Kelso JAS, de Guzman GC: Self-organization of trajectory formation. I. Experimental evidence 257
 Buchanan JJ → de Guzman GC
 Cartling B: Control of computational dynamics of coupled integrate-and-fire neurons 383
 Casari G → Andrade MA
 Castiglioni P → Pilgram B
 Cattarelli M → Litaudon P
 Chakravarthy SV, Ghosh J: On Hebbian-like adaptation in heart muscle: a proposal for 'cardiac memory' 207
 Cheron G → Draye J-P
 Chobanova M → Stephanova DI
 Chou C-P, Hannaford B: Study of human forearm posture maintenance with a physiologically based robotic arm and spinal level neural controller 285
 Clamann HP → Senn W
 Dannenberg S → Kutz DF
 Davis KA → Hancock KE
 de Guzman GC, Kelso JAS, Buchanan JJ: Self-organization of trajectory formation. II. Theoretical model 275
 de Guzman GC → Buchanan JJ
 del R. Millán J → Murciano A
 Di Rienzo M → Pilgram B
 Dijk BW van → Kalitzin S
 Dominey PF, Schlag J, Schlag-Rey M, Arbib MA: Colliding saccades evoked by frontal eye field stimulation: artifact or evidence for an oculomotor compensatory mechanism underlying double-step saccades? 41
 Draye J-P, Cheron G, Libert G, Godaux E: Emergence of clusters in the hidden layer of a dynamic recurrent neural network 365
 Eckhorn R → Juergens E
 Engelbrecht SE, Fernández JP: Invariant characteristics of horizontal-plane minimum-torque-change movements with one mechanical degree of freedom 321
 Eurich CW, Schwegler H: Coarse coding: calculation of the resolution achieved by a population of large receptive field neurons 357
 Fernández JP → Engelbrecht SE
 Funabiki N, Takenaka Y, Nishikawa S: A maximum neural network approach for N-queens problems 251
 Garvin GJ, Žefran M, Henis EA, Kumar V: Two-arm trajectory planning in a manipulation task 53
 Ghosh J → Chakravarthy SV
 Glatfelter AH → Suri RE
 Godaux E → Draye J-P
 Gomi H, Kawato M: Human arm stiffness and equilibrium-point trajectory during multi-joint movement 163
 Grillner S → Wadden T
 Hancock KE, Davis KA, Voigt HF: Modeling inhibition of type II units in the dorsal cochlear nucleus 419
 Hannaford B → Chou C-P
 Harvey JR, Bruner LJ: Neural spike generator entrainment by regularly spaced synaptic input 409
 Hellgren J → Wadden T
 Henis EA → Garvin GJ
 Hervé T → Litaudon P
 Hilberg W: Neural networks in higher levels of abstraction 23
 Hoffmann K-P → Kutz DF
 Inbar G → Bellomo A
 Ito K → Yuasa H
 Ito M → Yuasa H
 Ito S → Yuasa H
 Joeken S, Schwegler H, Richter C-P: Modeling stochastic spike train responses of neurons: an extended Wiener series analysis of pigeon auditory nerve fibers 153
 Jolley-Rogers G → Pressing J
 Juergens E, Eckhorn R: Parallel processing by a homogeneous group of coupled model neurons can enhance, reduce and generate signal correlations 217
 Kaipio JP, Karjalainen PA: Simulation of nonstationary EEG 349
 Kalitzin S, Dijk BW van, Spekrijse H, Leeuwen WA van: Coherency and connectivity in oscillating neural networks: linear partialization analysis 73
 Karjalainen PA → Kaipio JP
 Kawato M → Gomi H
 Kelso JAS → Buchanan JJ
 Kelso JAS → de Guzman GC
 Kleinle J → Senn W
 Kolev V, Yordanova J: Analysis of phase-locking is informative for studying event-related EEG activity 229
 Kolev V → Başar E
 Kruizinga P → Petkov N
 Kumar V → Garvin GJ
 Kutz DF, Dannenberg S, Werner W, Hoffmann K-P: Population coding of arm-movement-related neurons in and below the superior colliculus of *Macaca mulatta* 331
 Lan N: Analysis of an optimal control model of multi-joint arm movements 107
 Lansner A → Wadden T
 Leeuwen WA van → Kalitzin S
 Libert G → Draye J-P
 Litaudon P, Hervé T, Cattarelli M: Evidence for synchronised responses in the piriform cortex by using Gibbs potential analysis 119
 Lüscher H-R → Senn W
 Massone LLE → Myers JD
 Müller L → Senn W
 Murciano A, del R. Millán J, Zamora J: Specialization in multi-agent systems through learning 375
 Myers JD, Massone LLE: The role of the plant properties in point-to-point arm movements: a robustness study 173
 Nishikawa S → Funabiki N
 Parati G → Pilgram B
 Petkov N, Kruizinga P: Computational models of visual neurons specialised in the detection of periodic and aperiodic oriented visual stimuli: bar and grating cells 83
 Pilgram B, Castiglioni P, Parati G, Di Rienzo M: Dynamic detection of rhythmic oscillations in heart-rate tracings: a state-space approach based on fourth-order cumulants 299
 Pressing J, Jolley-Rogers G: Spectral properties of human cognition and skill 339
 Przybyszewski AW: Otto-Joachim Grüsser 1932–1995 315
 Przybyszewski AW: Overview of Otto-Joachim Grüsser's work 317
 Richter C-P → Joeken S
 Russell GS: Nested reentrant and recurrent computation in early vision: a Bayesian neuromorphic model applied to hyperacuity 195
 Sander C → Andrade MA
 Schlag J → Dominey PF
 Schlag-Rey M → Dominey PF
 Schwegler H → Eurich CW
 Schwegler H → Joeken S

- Senn W, Wyler K, Clamann HP, Kleinle J, Lüscher H-R, Müller L: Size principle and information theory 11
- Shastri SV: A biologically consistent model of legged locomotion gaits 429
- Shelhamer M: On the correlation dimension of optokinetic nystagmus eye movements: computational parameters, filtering nonstationarity, and surrogate data 237
- Spekreijse H → Kalitzin S
- Stephanova DI, Chobanova M: Action potentials and ionic currents through paranodally demyelinated human motor nerve fibres: computer simulations 311
- Suri RE, Albani C, Glatfelter AH: A dynamic model of motor basal ganglia functions 451
- Takenaka Y → Funabiki N
- Tetko IV, Villa AEP: Fast combinatorial methods to estimate the probability of complex temporal patterns of spikes 397
- Utikal KJ: A new method for detecting neural interconnectivity 459
- Valencia A → Andrade MA
- Villa AEP → Tetko IV
- Voigt HF → Hancock KE
- Wadden T, Hellgren J, Lansner A, Grillner S: Intersegmental coordination in the lamprey: simulations using a network model without segmental boundaries 1
- Werner W → Kutz DF
- Wright JJ: EEG simulation: variation of spectral envelope, pulse synchrony and ≈ 40 Hz oscillation 181
- Wyler K → Senn W
- Yordanova J → Başar E
- Yordanova J → Kolev V
- Yuasa H, Ito S, Ito K, Ito M: Associative memory with the reaction-diffusion equation 129
- Zamora J → Murciano A
- Žefran M → Garvin GJ
